

Medical Infrastructure-Users Forum Brussels, December 6th, 2019

Meeting venue: [Science 14](#), 14b Rue de la Science – Brussels

The CORBEL Medical Infrastructure/ Users Forum (MIUF, WP3.1) is designed to promote close collaboration, at the pan-EU level, between medical research communities, funding bodies, and medical research infrastructures. In particular, its mission consists of promoting the establishment of pan-European scientific communities, providing the scientific content and access to patients; clearly defining the respective roles of infrastructures vs. scientific communities, avoiding gaps, overlaps and fragmentation ; capturing the needs of the scientific communities and of the funders in terms of infrastructure services ; and of ensuring the appropriate development and deployment of these services by one or multiple research infrastructures.

The December 2019 MIUF meeting is intended to discuss

- *the structuring of medical research communities at the pan-European level*
- *the emerging needs of medical research projects in the context of the big data*
- *and the challenges raised in terms of development and deployment of data services*

Programme:

10:00 registration & coffee

10:10 Introduction

Objectives of the meeting and *PerMIT* project (*J. Demotes*)

10:30 Session 1 – promote the use of RIs across disciplines and countries

- EBRA – European Brain Research Area (*H. Lichtenberg*)
- ERN – European Reference Network (*tbc*)
- Mission Cancer (*C. Chomienne - tbc*)
- European Stroke Society (*P. Kelly – tbc*)
- Medical device: the TBMed trial (*D. Letourneur – tbc*)

Discussion: What are the specific needs in terms of tools and services? How to keep the collaboration after the end of CORBEL?

12:45 lunch

13:45 Session 2: European Open Science Cloud

- EOSC-Life (*N. Blomberg*)
- Clinical trial data sharing toolkit- overview (*S. Battaglia*)

Discussion: what are the EOSC services / tools most relevant for the medical research community? Data sharing tools; Anonymisation services; Secondary use of data for health research; Multimodal data management and machine learning/stratification...

15:30 wrap-up and next steps

16:00 coffee and end of the meeting
